

Building an All Abilities Transportation Network

Looking at Other Counties and Cities

July 12, 2016

Six case studies will be referenced during the workshop. They provide examples of transportation planning and implementation occurring in:

1. Denver "Living Streets"
2. LA County Metropolitan Transportation Authority "Complete Streets"
3. New York City "Vision Zero"
4. Baltimore County "Complete Streets"
5. Hennepin County "Complete Streets"
6. Minnesota Comprehensive Community Scan "Complete Streets"

Due to the amount and size of the information associated with this portion of the workshop, the case studies are not being provided in the workshop packet. However, all case studies are being sent as electronic and/or paper files to all Commissioners in advance of the July 12 workshop, and the information for each case study will be made available for future reading and download by the public on the Ramsey County website alongside the rest of this workshop packet information.
