Food Safety for Delivery and Pick-up Services

Keep hot food hot and cold food cold

Keep hot and cold food separated when prepared for delivery or pick-up so that it stays out of the temperature danger zone. The temperature danger zone is between 41°F and 135°F.

- Maintain cold food at 41°F or below.
- Maintain hot food at 135°F or above.
- Always use a thermometer to check food temperatures.

Use mechanical refrigeration, hot holding equipment, or insulated containers when holding food in staging areas for delivery or pick-up.

- Equipment and multi-use containers must meet Minnesota food code Equipment Requirements (https://www.health.state.mn.us/communities/environment/food/docs/fs/equipreqfs.pdf) (PDF).
- Single-service and single-use articles must be safe and clean. This includes items such as carry-out utensils, bags, containers, or wrappers. Other ordinances may apply.
- Tightly close or seal all food items prepared for pick-up or delivery to keep it safe from tampering.
- Plan order preparation and delivery to minimize the length of time food is out of temperature control.

Contact your inspector if you have questions.

Food delivery best practices

- Protect food orders during storage, packaging, and transportation to prevent cross-contamination and contamination by dust, insects or other sources. Keep equipment and vehicles clean.
- Place raw animal food, unpackaged produce, and ready-to-eat food items into separate delivery packages to prevent cross-contamination.

Food pick-up best practices

- Minimize the time hot and cold food items are placed in non-mechanical holding containers.
- Wrap or cover food items completely to protect the food from contamination while holding for pick-up.

- Place raw animal food, unpackaged produce, and ready-to-eat food items into separate delivery containers to protect the food from cross-contamination.

Social distancing

- Whenever possible, strongly encourage online ordering and delivery or pickup instead of in-store shopping.
- Keep a distance of at least 6 feet between individuals within stores and at checkouts.
- Please see Strategies to Slow the Spread of COVID-19 in Minnesota (https://www.health.state.mn.us/diseases/coronavirus/action.html) for updated actions you can take to protect yourself and your community.

Sick employees

- All of the normal employee illness requirements for reporting and exclusions apply. See Illness Reporting for Food Establishments (PDF) (https://www.health.state.mn.us/people/foodsafety/dwi/empillfs.pdf).
- Employees who have symptoms of acute respiratory illness should stay home and not come to work until they are free of fever (100.4°F.or greater using an oral thermometer), signs of a fever, cough, and any other symptoms for 7 days and at least 3 days without the use of fever-reducing medicines and improvement of respiratory symptoms (whichever is longer).
- FDA has provided additional guidance about employees with fevers and respiratory illness on their website Coronavirus Disease 2019 (COVID-19) Frequently Asked Questions (https://www.fda.gov/emergency-preparedness-and-response/mcm-issues/coronavirus-disease-2019-covid-19-frequently-asked-questions#food).

Personal health and hygiene

- Stay at home if you have a fever, runny nose, cough, sneezing or other respiratory symptoms, or if you believe you are sick.
- Ensure that handwashing facilities are readily available for employees and customers. Every sink needs warm running water, soap, and disposable towels.
- Wash your hands frequently and thoroughly with soap and warm water for at least 20 seconds.
- Hand antiseptics (sanitizers) are not a replacement for proper handwashing. If you provide hand antiseptics in customer areas, it should be an alcohol-based hand product with at least 60% alcohol active ingredient.
- Cover your cough and sneeze. Cough or sneeze into the crook of your arm.
- Avoid touching your face with unwashed hands.

Cleaning and sanitizing products

- In addition to all of the regular requirements, we are advising that establishments routinely clean high-touch surfaces.
- Examples of high-touch surfaces include tables, doorknobs, light switches, faucets, point-of-sale systems, keyboards, telephones, etc.
- We recommend that they use products with EPA-approved emerging viral pathogen claims:
  - EPA's Registered Antimicrobial Products for Use Against Novel Coronavirus SARS-CoV-2, the Cause of COVID-19
  - American Chemistry Council Center for Biocide Chemistries - Novel Coronavirus (COVID-19) Fighting Products
- Follow the manufacturer's instructions for all cleaning and disinfection products (for example, concentration, application method, contact time, and the use of personal protective equipment, and don't mix them together!)
- Not all products are appropriate for food contact surface sanitizing.

Payments and transactions

- Exchange food orders in person while maintaining at least 6 feet between individuals.
- Keep orders in a secure location within your establishment while waiting for customer pick-up.
- Conduct payment transactions electronically, preferably online, when possible.

Retail establishments who sell food to be consumed off-site

Retail establishments which sell food to be consumed off-site are not included in this suspension so long as there is no on-site food consumption. Nevertheless, we want to encourage the direct order and pickup of product to help prevent the spread of Coronavirus and COVID-19.

- Farmers' markets
- Grocery stores
- Pharmacies
- Hardware stores
- Retail outlets

Novel Coronavirus (COVID-19)—Fighting Products[i]

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been pre-approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the 2019 novel coronavirus (COVID-19) outbreak. This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use during the COVID-19 situation.

The information in this document is being provided as a public service. All efforts have been made to ensure the information is accurate, but ACC and CBC make no representations or warranties as to the completeness or accuracy of the information. ACC, CBC, and the product manufacturers listed in this document reserve the right to change, delete, or otherwise modify the information without any prior notice. Persons receiving this information must make their own determination as to a product's suitability prior to use based on the product labeling. ACC and CBC do not guarantee or warrant the standard of any product referenced or imply approval of the product to the exclusion of others that may be available. All products listed are registered for labeled uses in accordance with federal laws and regulations as of the date this document is being made available. State regulations may vary. In no event will ACC or CBC be responsible for damages of any nature whatsoever resulting from the use of or reliance upon products to which the information refers.

Note: The CBC cannot make a determination of the effectiveness of a product in fighting pathogens like COVID-19. For questions related to the effectiveness of any product not listed below, please contact the manufacturer directly.

For use of the product, please contact the company/distributor to confirm use directions, or consult the EPA approved label at https://www.epa.gov/pesticide-labels/pesticide-product-label-system-ppls-more-information.

Tier I Products - Products that are in compliance with EPA's *Emerging Viral Pathogen Guidance for Antimicrobial Pesticides*

Tier II - Products that Disinfect Against Human Coronavirus

As of March 13, EPA is supporting the use of products that have demonstrated efficacy against another human coronavirus similar to SARS-CoV-2 on its List N, Disinfectants for Use Against SARS-CoV-2. In other words, the product has not proven that it can kill harder to kill viruses than SARS-CoV-2, which would be a Tier I product, but it can kill viruses like SARS-CoV-2. CBC therefore has amended its list to include a Tier II listing of products that state that they can disinfect human coronavirus.

EPA recommendation is that only if a product with an emerging viral pathogen claim is not available, use a product that will disinfect against human coronavirus.

Tier II - Products that Disinfect Against Human Coronavirus

As a public service, CBC is maintaining this list of antimicrobials that have proven to be effective against stronger pathogens, such as norovirus or ebola. By publishing and maintaining this open list, CBC relieves federal, state, and local health officials' resources in order to focus on other aspects of the important effort to limit spread of this new disease. Listing is voluntary and compliance with EPA's "emerging viral pathogen" guidance for antimicrobial products is verified by CBC. CBC will be working with federal and state officials to disseminate the list and make it accessible to all those who need to be in the know.

[i] To include a product on CBC's list of Coronavirus-Fighting Products, registrants of the products should please contact Ms. Komal K. Jain at [illegible]
